

Click and drag on plot to zoom in. Double click to zoom back out to full size. Hover over a box to see the parametric seven-number summary of the quality scores at the corresponding position.

These plots were generated using a random sampling of 10000 out of 2134717 sequences without replacement. The minimum sequence length identified during subsampling was 301 bases. Outlier quality scores are not shown in box plots for clarity.
